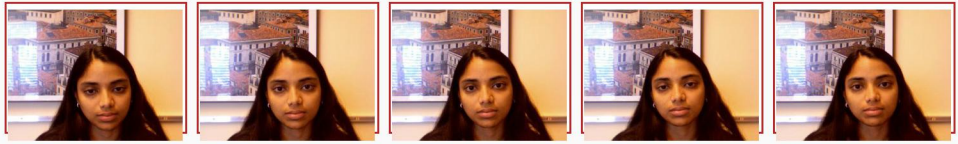
Client014 false-positive case study

5-frame CNN-LSTM student, threshold = 0.103, positive class = attack

Adverse real 1
Result: FP
GT: real | Pred: attack
Score: 0.852429
Threshold: 0.103



Adverse real 2
Result: FP
GT: real | Pred: attack
Score: 0.974687
Threshold: 0.103

Controlled real 1
Result: Correct
GT: real | Pred: real
Score: 0.000476
Threshold: 0.103

Controlled real 2
Result: Correct
GT: real | Pred: real
Score: 0.000483
Threshold: 0.103

False positives occur only in adverse genuine videos; controlled genuine videos of the same subject are correctly classified.
